

GATE PROJECTS

Gate Merchant.

Reimagined for crypto.

A zero-to-one merchant platform.
Payments, payouts, and access, all in one place.

A case study
by the sole designer.

THE LINEUP

Three products. One vision.

GATE TRAVEL

Book the world,
pay in crypto.

GATE MERCHANT

Accept, manage,
and grow.

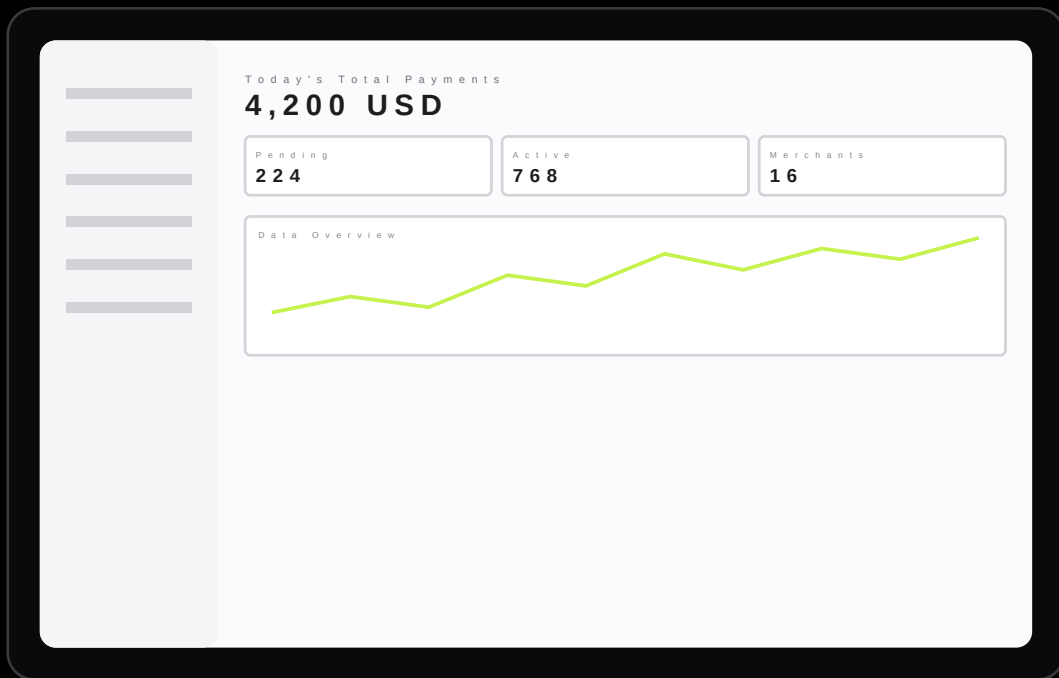

GATE CARD

Spend anywhere,
settle anywhere.

Today's chapter — Gate Merchant.

THE PRODUCT

Every payment, beautifully managed.
From a single dashboard.

Real-time payments, payouts, RBAC and API management —
in a single pane of glass.

AT A GLANCE

Small team. Big numbers.

ROLE

Sole
designer

PERIOD

2
weeks

DAU GROWTH

1000
%

Designed, prototyped, and shipped in two weeks.
Daily active users grew 10× post-launch.

Background.

Gate Merchant is a zero-to-one product. It bundles payment collection, deposits, withdrawals, payouts, role-based access, and a full API into one cohesive platform, replacing what used to be five disconnected tools.

The challenge.

01 **Make crypto feel familiar.**

Translate the language of on-chain finance into concepts any merchant already understands.

02 **Sharpen the value proposition.**

Rewrite the product narrative so a first-time visitor knows what to do within five seconds.

03 **Upgrade the interaction model.**

Replace dense, table-heavy flows with focused, task-oriented surfaces.

Designed by one. Built for many.
